

## Gutenberg Style on Soviet Union and Healthcare

By Shomit Sirohi

German Idealism of Experience -

Experiences can be Jewish experiences.

### I. Imagining Wisconsin Today

When they are in a film edit - like themselves, with the beer, and the conversations and the flow, even on health distress it is Wisconsin, like it was Vaishali, even in Hyderabad, their own life and forms and explanations which then is how to as well handle it in a flow.

### II. Soviet Union - Stories which fit Communism in the Soviet Images of Hanging out these days in Wisconsin

CPSU has met each other in the neighbourhood - this is because it is fused and active culture after years of alienation, to be negated by fusion which is definitely Soviet behaviour under Sirohian rule of leadership - like a reflective process or judgement - that this is the correct process happening -

So in fact they hang out with beers and converse - meet them if you're ill - it is handled in conversation, Communist intellect like Pushi also at work perhaps - a perception hun.

### III. Soviet Projects, Arguments everything Seeing Zizek and Sirohi talk it out in a gathering

In fact we just laugh through the process. Call this paranthesis - my point in fact on philosophy - what Cornel West calls his love for paranthesis throughout in Sirohi's will to live in fine ways and in support we cannot extend because of axioms in philosophy, but is a good idea of what we are doing on AI, thanks, Sirohi is fine in 15 minutes. He claims and is always Prophetic.
